(54) ANTIBACTERIAL LOW IRRITATING COSMETIC MATERIAL

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a cosmetic material manifesting an effective antibacterial effect, not only not showing a primary irritation or a sensitization to a skin, but also not giving an uncomfortable feeling such as a piercing pain, an irritating feeling and a prickling feeling on using the cosmetic material.

SOLUTION: This antibacterial low irritating cosmetic material contains one kind, or two or more kind selected from polyhydric alcohols and alkylethers of the polyhydric alcohols, and one kind, or two or more kinds selected from extracts of plants having an antibacterial activity to begin with a ginkgo and a low striped bamboo (*Sass alba-marginata*). Since the antibacterial activity is synergistically enhanced by the simultaneous utilization of 0.01-20.0wt.% one kind or two or more kinds of the plant extracts in a system containing \geq 5wt.% polyhydric alcohol and the alkylether of the polyhydric alcohol, and the irritating property to a skin or an uncomfortable feeling on use can markedly be reduced.
